David:

Just a quick update.... The school district hired a contractor (Allied International) to handle the cleanup of the mercury in the Junior High School.... CTEH is also onsite assisting. I spoke with the Allied rep. this morning and he generally assured me that they knew what they were doing I will call again this afternoon to get an update.

The odds of us going out there to assist are low now.... Not zero.... But, very low. I will let you know if that changes.

thanks
